

Learning Logs

A web application built with **Django** that allows users to organize and track their learning journey. Users can create topics, add entries, manage their personal learning logs, and optionally make topics public for other visitors to view.

Features

- User registration and authentication
- Create, edit, and delete topics
- Create, edit, and delete entries
- Public and private topics
- Search topics and entries
- Responsive interface using Bootstrap 5
- Django admin interface

Technologies Used

- Python
- Django
- Bootstrap 5
- SQLite (development)
- HTML/CSS

Installation

Clone the repository:

```
git clone https://github.com/aryagohar/learning_logs.git
cd learning_logs
```

Create and activate a virtual environment:

```
python -m venv .venv
```

Windows:

```
.venv\Scripts\activate
```

Linux/macOS:

```
source .venv/bin/activate
```

Install the dependencies:

```
pip install -r requirements.txt
```

Apply database migrations:

```
python manage.py migrate
```

Create an administrator account (optional):

```
python manage.py createsuperuser
```

Run the development server:

```
python manage.py runserver
```

Open your browser and visit:

```
http://127.0.0.1:8000/
```
